Hi,

I'm sorry, I haven't had a moment all day to talk to graphics because I'm wrapped up in Gold King Mine response. Cheryl is out today and Jan Byers is already gone for the day. Nicole, maybe you can talk to Jan tomorrow if she's in? I'm also not sure if she is printing the map posters- Leslie and I talked yesterday, and I think I may have been responsible for contacting Jan about poster printing, which I did not do yet. Apologies for not getting on this sooner, the emergency response is really diverting my attention.

Thanks,

Sarah

Attached is a revised ppt. I included some map figures from the SI report that show sampling locations.

For the overall Argonaut timeline, the figure will have to be drafted by graphics and Sarah can request graphics to do that. Below are some SA milestones:

October 1998 – Preliminary Assessment completed for Tailings Area only.

2008 – Site Reassessment completed for Tailings Area only, with referral to DTSC for enforcement.

2011 – DTSC requests EPA take the lead on clean-up and remediation at the Tailings Area.

July 2014 – Sampling for Site Inspection completed in both Tailings Area and former Mill Area.

July 2015 – Site Inspection completed.

Thanks Leslie. My initial thought is that we should not go into too much detail about HRS etc. I expect that we will hold a meeting in early Jan/Feb that is devoted to listing and resources made available to EPA and the communities for NPL sites. I think it would be good idea to include an overall map showing the areas we sampled and the areas that showed elevated levels of contamination that we are concerned about. I think we should also make clear that we are dealing with urgent issues through our removal program and that the longer term issues are what need the listing for.

So maybe you could combine a couple of slides and take out the HRS slide.

Thanks

Nicole

I have a draft powerpoint that explains the NPL process a bit. I copied/pasted some slides from other presentations. There's a timeline on the last slide. I don't know if that's what you're looking for, it's a table.

Hi Leslie-

Can you modify the listing timeline for Argonaut to show some of the actions we were talking about with Sarah. If you don't have time, can you send me and Sarah the file so we can work with it while you are out.

Thanks

Nicole
